It was an honour for the Ajman Chamber to host another great event – Ajman International Education & Training Exhibition and Conference in the Emirates of Ajman, United Arab Emirates.

Academics and industry members from around the middle east and Foreign countries will gather to discuss the Theme “Building Academic Reading Skills to achieve sustainable Knowledge Development” in the occasion of the year of Reading in UAE

The conference will be discussing general issues affecting the reading skills in higher educational institutions and methods of changing the concept of higher education into knowledge in higher education Institutions by encouraging students to read more especially in the lights of the rapid development of information and communication technology that affected the concept of reading in the last decade ,. Idea sessions and dialogue will be held on adaptation, and innovation in education and research, to ensure students of the different fields will benefit from the most relevant and current practices which consider reading as a major tool to achieve sustainability in the concept of knowledge .

Total Attendees : 400

Countries: 6

Institutions: 30

Number of sessions : 3

Conference Topics:

The conference will be discussing three topics during the 8th of March 2016 in three panels. There will be one moderator and 4 speakers in each one to discuss the topic directly with the audience through open discussion.

The conference topics include:

1. Reading as a tool to achieve knowledge in higher educational institutions in the UAE and the Middle East
2. The role of information technology in building academic reading skills (Pros and Cons),
3. Achieving sustainable cognitive development through reading and the impact on the outcomes of higher educational institutions

Methodology:

Each panel of the conference will have two parts. The first part is the discussion between the moderator and the panelists and then the discussion between the panelists and the audience. They will analyze the panel and exchange their opinions about the topic. Media will present to cover the discussions with full transparency.

Conference Goals:

The aim of this international conference is to provide all stakeholders of higher education with a platform to share experience and expertise in creating innovative and successful learning by relying on reading as a pivotal factor in higher education and methods of achieving sustainable knowledge.

Who Will Attend?

This conference will bring together representatives of a wide range of higher education institutions and related organizations

from around the world in a dynamic and interactive conference focuses on important topics including:

- Officials
- Educationalists
- Academic managers
- Quality assurance specialists
- Educational system leaders
- Researchers
- Students
